**Columbus video - Highlights of the STS-122 mission**

7 April 2008

Experience our short 50-minute film featuring the highlights of the STS-122 mission: the launch of Space Shuttle Atlantis exactly two months ago, the docking with the International Space Station on 9 February 2008, connecting the Columbus laboratory two days later as well as the three EVAs (one featuring German astronaut Hans Schlegel). We see inside the new European research lab for the first time and then the return of the shuttle on 20 February.

To see the videos, click on the image or download from the link in the right-hand column.
