SUMO User Conference 2019
Simulating Connected Urban Mobility

May 13-15, 2019

German Aerospace Center
Institute of Transportation Systems
Rutherfordstr. 2, 12489 Berlin, Germany

Introduction
Traffic simulations are of immense importance for researchers as well as practitioners in the field of transportation. Eclipse SUMO is open source and has been available since 2001. It provides a wide range of traffic planning and simulation applications. SUMO consists of a suite of tools covering road network imports and enrichment, demand generation and assignment and a state-of-the-art microscopic traffic simulation capable to simulate private and public transport modes, as well as person-based trip chains.

Call for Papers
The conference aims on presenting new and unique results in the field of mobility simulation and modelling using openly available tools and data. Areas of interest include:
- Vehicular Communication
- Autonomous Driving
- Modelling Urban Mobility and Intermodal Transport
- Logistics Simulation
- Traffic Applications and Traffic Management Solutions
- Open Tools and Open Data

Authors are requested to submit the title of the paper and an abstract of 300 words or a topic for posters in English no later than Friday, 18th of January 2019. All accepted papers will be published in the SUMO proceedings as part of the EPiC Series.
