

Aerogels – A practical workshop

German Aerospace Center, Cologne, Germany
Institute of Materials Research

26th-28th September 2016

Hands-on course in
synthesis and
characterization of
aerogels

Aerogels are
highly porous
solid materials
with low densities
and low thermal
conductivities
synthesized via
sol-gel processing.

LET YOU INSPIRE!

Lectures on

- ✓ Synthesis of organic, inorganic and biopolymeric aerogels
- ✓ Characterisation of aerogels
- ✓ Industrial applications

Registration until 14.08.2016
